## FLEET TRACKING

# How GPS Tracking Can Help Your Company

Our easy-to-use web interface lets managers have all their critical fleet information with the click of a mouse. Companies realize an ROI within weeks of using the system simply by the positive change in driver behavior. Other uses and benefits included:

- **Monitor Gas Cards / Gas Purchases:** Let's face the facts – fuel is an expensive business cost at any price and can cut money out of your bottom line. Even if one employee wastes or steals \$20 in fuel every week that's \$1,040 a year your business loses! Take control and monitor questionable fuel purchases with our easy-to-use GPS fleet tracking when you integrate with our Voyager Fuel Card platform.
- **Dispatch:** The system allows dispatchers to send drivers to more jobs without the cost of more vehicles. Routing becomes easier and more efficient. The advantages to your dispatchers are valuable and immediate.
- **Driver Accountability:** Drivers now have a way to verify customer visit times and work completed. This offers them a reliable way to track their progress and protects them (and you!) against customer complaints. Further, there won't be any more "gray area" when an employee or customer disputes billable time spent on the job.
- **Customer Service:** Your customers will benefit from increased accuracy, faster status reporting, detailed billing information, and fewer delays in arrival time. These are just a few of the ways your customers and your employees will enjoy GPS tracking.

## SENSLYNX GPS:

- **SIMPLE**
- **MODERN**
- **INTUITIVE**
- **WEB-BASED**
- **FEATURE PACKED**

### LOCAL / REGIONAL FLEET

- Improve Customer Service
- Control Fuel Costs
- Improve Safety and Reduce Risk
- Tracking Updates Every 60 Seconds
- Alerts for Speeding, After-Hours, Excessive Idle, Maintenance and Landmarks
